

Smart7™ Offline Cashless Payment Terminal

CASHLESS PAYMENT, COMPACT FORM

Smart7 delivers next generation closed loop cashless technology from CPI. With an all in one form factor, the Smart7 adds simple yet effective cashless payment to your machine creating an additional revenue stream for your vending operation.

- All in one solution, Smart7 is all you need for a complete closed loop payment system on your machine, eliminating the need for multiple devices
- The new cloud based GEN7 Configurator application allows you to create and update configurations at your convenience.
- Simple online configuration followed by USB data transfer provides a seamless installation experience
- Create a personalized shopping experience for your consumers via the interactive display
- With plug and play via MDB, the Smart7 reader connects with existing coin changers and bill validators for a seamless installation
- Secure encrypted firmware and configuration files ensure safeguarding of your systems
